

## 2.13 Instructor-Course Assignment Application aka coursebrew 😊

The Instructor-Course Assignment Application is a web-based application that allows University Program Coordinators to assign Instructors to the Courses that they are teaching for a certain school-year semester and export this data as an PDF file. Currently, Program Coordinators use an outdated, hard-to-navigate Excel Spreadsheet to assign professors to courses. Our product will benefit the sponsor by having a user-friendly, easy-to-navigate interface that provides a clear guidance on the process of Instructor-Course assignment.
