2.13 Instructor-Course Assignment Application aka coursebrew ☺

The Instructor-Course Assignment Application is a web-based application that allows University Program Coordinators to assign Instructors to the Courses that they are teaching for a certain school-year semester and export this data as an XML file. Currently, Program Coordinators use an outdated, hard-to-navigate Excel Spreadsheet to assign professors to courses. Our product will benefit the sponsor by having a user-friendly, easy-to-navigate interface that provides a clear guidance on the process of Instructor-Course assignment.

Figure 1:   Phillip Tran   David Johnson   Kiana McDaniel

Name	Responsibility
Kiana:	*User Experience Architect:* - *User Interface Design and Implementation*
David:	*Backend Developer:* - *Program Scripting, Error Handling, Data Formatting*
Phil:	*Software Engineer:* - *Program Scripting, Program Interface, Server Developer*
